CODING TRAINEESHIP   **IT Career Switch Ltd**
                                             Coding Traineeship – Full stack developer
                                             1-year program

                                             During the traineeship I had to demonstrate a very competent level of the
                                             following programming languages and technical skills

                                             - HTML5, CSS3, JavaScript
                                             - PHP, SQL, React, jQuery
                                             - Python, Node.js, Bootstrap
                                             - Command line Git, Github
                                             - Remote API access

ADDITIONAL TECHNOLOGIES:

                                             - MySQL, Redux, Django

DEVELOPMENT EXPERIENCE:
Below are the two briefs of development projects I completed with IT Career Switch which can be found in my bio:
https://roxanamanolea.co.uk/

Portfolio Project #1: "Gazetteer"
The specification was to reply to a website specification for a map-based app to provide information on countries, with a focus on a "mobile-first" development. Preferably using a framework, to then develop HTML, CSS and JavaScript with JQuery modules that use PHP server-based components to source data from third-party APIs (Geonames, OpenWeather). The solution is assessed on its delivery to specification, functionality, and usability.

Portfolio Project #2: "Company Directory"
A more rigorous reply to this specification was required as a user requirements document was needed to be prepared which, when signed off, triggers the release of SQL allowing to develop a "mobile-first" application to maintain a company personnel database (MySQL). Sign off is only achieved upon the student supplying an independently witnessed document providing confirmation of the system's ability to perform error-free.
